

Design Proposal Application for project on low literacy

- Use bright colors as background. This helps to improve concentration.
- Use different (bright) colors per question. This is also to improve concentration.
- Use a clear font style to keep things simple.
- One question with the multiple answers on the same screen.
- The answers are clickable buttons.
- Show right away whether the answer is correct or not.
- Use icons to make the program easy to understand and use.

Question 6/10

There was dirty wash. When it comes out of the laundry it is clean. In which state is the wash after it came out of the laundry?

Dirty

Clean

Wash

Question 2/10

There is a triangle and there is a circle, in the middle of the circle is a square. What is in the circle?

A triangle

A circle

A square

The idea is that the “thumbs up” are the buttons that need to be clicked to pick an answer. Right after an answer is picked, there is a new screen which shows you if you picked the correct answer or not.

GOOD JOB!
YOUR ANSWER WAS CORRECT

THAT WAS NOT CORRECT
